

CRANE LOADING SYSTEM

Billco's Crane Loading System is a complete solution for storing, organizing and loading glass to the cutting table. The system may include fixed racks and/or automated compact drawer storage. This fully automated system retrieves and loads single sheets of glass without operator intervention. Designed with versatility in mind, multiple cutting tables may be loaded from one system and glass storage may be in an adjacent bay.

Processing Capabilities

Maximum Glass Size: 108" x 144," 130" x 204"

Glass Thickness Range: 2.2mm–19mm

Level of Automation: Fully

Standard Maximum Pack Thickness: 30"

Standard Crane Span: Up to 50 ft.
(Wider Spans Available)

Industries

Architectural, Coating, Mirroring, Specialty

CRANE LOADING SYSTEM

Key Advantages

- Customizable Layout: Tailored for individual plant requirements and simple layout changes
- Rotating Vacuum Glass Grab: Provides processing flexibility and efficiency
- Integrates Seamlessly with Billco or Third Party Cutting Equipment
- Stand-Alone Control System: Provides flexibility to operate crane independently from cutting line
- High Speed Precision: Advanced laser control system and heavy-duty drive components permit maneuvering at high speeds
- Fully Automated: Easily interfaces with the Cutting Line Control System and Optimization Software

Outstanding Features

- Welded Steel Plate Construction
- Laser Transducer: Provides accurate real-time positioning feedback
- “Dump Routine:” Protects operators by retrieving and dumping broken glass at a safe location
- Multi-Bay Loading
- Pack Thickness Sensors: Pre-calculate glass volume prior to retrieval to reduce cycle time
- Non-Marking Vacuum Cups: Protect the glass surface and soft coatings
- Wireless Pendant: Keeps operator at a safe distance from moving glass when manual operation is needed

Optional Features

- Increased Crane Span
- Decoupled Tilt Arms (*Adaptive Loading*)

Supporting Equipment

- Rack Bases
- Glass Racks
- Space Saver Storage System
