

STRAIGHT LINE EDGER

DESCRIPTION

The Straight Line Edger is designed to grind and polish the straight edges of flat glass in a single, continuous process. Combining seaming, coarse grinding, fine grinding, and polishing into one operation, it delivers smooth, high-quality edge finishes with excellent accuracy and efficiency. Ideal for high-volume production, the machine provides consistent results while reducing processing time and improving productivity.

HIGHLIGHTS

- ✓ Fast, Accurate, and Stable Edging
- ✓ Compact and Space Saving Design
- ✓ Robust Structural Design
- ✓ Easy Installation
- ✓ Rough and Fine Edging

SPECIFICATIONS

-  98" x 98" (2500 x 2500 mm)
MAX GLASS SIZE
3.15" x 3.15" (80 x 80 mm)
MIN GLASS SIZE
-  1.6-19.7 FPM (0.5-6 m/min)
PROCESSING SPEED
-  3-19 mm
GLASS THICKNESS
-  9
MOTORS
