i-SERIES WASHER

DESCRIPTION

The i-Series Washer is an industrial-duty washing and drying system designed for high volume glass production. It safely cleans common glass types without scratching, delivering consistent, high-quality results for demanding production environments. A compact top-mounted blower and side-mounted air filter provide a space-saving design while allowing easy inspection and maintenance.

HIGHLIGHTS

- ✓ Pre-Spray, Detergent Wash, Rinse, Final Rinse, and High Pressure Air Drying System
- ✓ Soft Bristle Low-E Brushes
- ✓ Heavy Duty Stainless Steel Frame
- ✓ Architectural, Mirror, Show Door, and Specialty Industries

SPECIFICATIONS

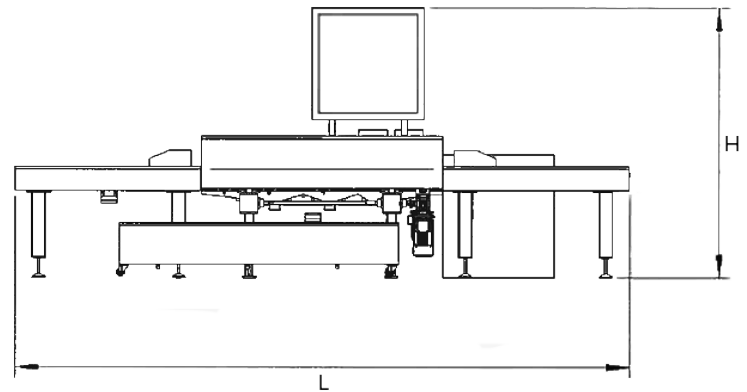

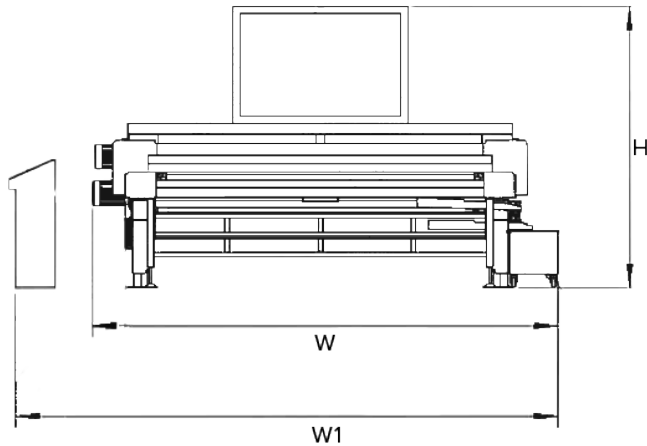

-  96" (2438 mm)
MAX GLASS SIZE
20.5" (520 mm)
MIN GLASS SIZE
-  1.5-19 mm
GLASS THICKNESS
-  30 FPM (9 m/min)
PROCESSING SPEED
-  3 Pairs
BRUSHES

TECHNICAL SPECIFICATIONS

W	L	H	W1
173.25" (4400 mm)	220.5" (5600 mm)	100.39" (2560 mm)	199.25" (5061 mm)

FEATURES

✓ Two (2) Pairs of Air Knives

PRE-WASHING SECTION

The pre-washing section features an independent water tank, top and bottom spray zones, and three (3) of cylindrical brushes, including a dedicated Low-E brush for safe, effective cleaning of coated glass.

✓ Light Inspection Device

HEATED WATER TANKS

Three removable stainless steel water tanks with integrated pumps and heaters maintain optimal water temperature for consistent washing performance while simplifying maintenance.

✓ PLC System

FREQUENCY CONVERTER

A variable frequency drive optimizes motor speed to reduce energy consumption while maintaining efficient washing performance.
