ProVia Upgrades Washer with New Z-Series

ProVia was started in 1977 in Walnut Creek, Ohio and has grown into a nationally known manufacturer of high quality entry door systems, energy-efficient windows, super polymer vinyl siding and artfully-crafted, manufactured stone. Driven by ingrained values, ProVia is committed to utilizing old world craftsmanship to deliver timeless quality products from one of its five facilities.

When it was time to replace one of their aging washers, it was a combination of past experience and new product features that influenced their purchasing decision. The Z-Series washer offered features that minimized their maintenance requirements and overall downtime. "I would recommend Billco washers to others, the features and design of the Z-Series washer has got to be the best on the market." States Marvin Troyer, Maintenance Supervisor at ProVia.

With a few process recommendations from Billco's service team, Troyer is pleased with the improvement to their consumable product life and overall product quality. Billco is committed to its customers before, during and after-installation to ensure expectations are exceeded. "Service and support has been great. I do appreciate how Billco has been reaching out to us continuously after the washer has been installed." states Troyer.
