# HEAT PRESS

*Billco's Heat Press is designed to rapidly and precisely heat and press any IG Unit sealing system that requires heat and/or compression for sealing.*

## Processing Capabilities

**Equipment Type:** IG Unit Press

**Conveyor Width(s):** 60", 84", 96"

**Minimum Glass Size:** 9"–12" square

**Automation Level:** Full

**Spacer Capability:** Flexible Spacer and Intercept

# HEAT PRESS

## Key Advantages

Runs Flexible Spacer and Intercept

Patented Heating Technology:  
Efficiently minimizes power requirements

Maintenance Friendly Design: Minimizes  
routine maintenance time

Industrial Duty: Built to work and built to last

Precision Press Control: Consistent and  
reliable control over IG Unit production

Improved Substrate Bonding: Lengthens  
life expectancy of IG Unit

## Outstanding Features

Intelligent Ventilation System:  
Reduces operating costs and extends component life

High Temperature Roll Bearings

Specially Designed Stainless Steel Rollers

Easy to Operate and Maintain

## Advantages of Billco's Patented Heating Technology

Less negative glass deflection when the units  
are sealed immediately after compression

Drastically reduced "cool down" time prior  
to achieving optimum gas fill levels

More precise dimensional control of IG Unit

Insures proper sealant "wet-out" and bonding to glass surfaces

## Billco Services

Billco provides the backbone for flat glass production lines—large and small—with high quality American-made equipment and 24-7-365 never-fail relationships. Our stability and expertise is proven with high customer satisfaction ratings, uptime statistics, impressive ROI, and a multi-million dollar inventory of ready-to-ship replacement parts. Our Solution Specialists, 24-7-365 Technical Support, and Replacement Parts Team are fully dedicated to keeping your line moving. Call or visit our website for more information.
